TRANSMITTAL OF THE BUILDING 450 - PRE-DEMOLITION SURVEY REPORT (PDSR)
DWF-019-05

Provided for your review and approval is the enclosed subject report for the 450 facility. This report characterizes the physical, chemical and radiological hazards associated with this facility, summarizes the characterization activities, defines the Data Quality Objectives developed for this characterization, and presents the data quality assessment, verification and validation of results.

PDS results indicate that radiological contaminants exist in excess of the PDSP unrestricted release limits, and fixatives were used to immobilize loose radiological and beryllium contamination. Therefore, the entire building will be managed as LLW-PCB Bulk Product Waste during demolition. RCRA hazardous waste items have been removed from the building. Asbestos abatement was not required.

Based upon this PDSR and subject to concurrence by the CDPHE, this facility is acceptable for demolition. Please notify Kaiser-Hill when you transmit this document to CDPHE. If you have any questions, do not hesitate to call me or Duane Parsons at extension 6458.

RE: Pre-Demolition Survey Report (PDSR) for Building 450 - Approval

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the PDSR for Building 450 (Version 0, dated February 28, 2005). Your letter regarding this PDSR was received by fax on March 9, 2005. Based on the information contained in this PDSR, we are hereby approving the PDSR for Building 450.

As stated in this PDSR, B450 (including the ducts, slab and below grade infrastructure) remains radiologically contaminated and will be appropriately protected, demolished, removed, and disposed as LLW-PCB Bulk Product Waste.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator
